# PSAR FUND

INVESTING IN HABITAT RESTORATION AND PROTECTION TO BRING BACK PUGET SOUND'S DYNAMIC NATURAL SYSTEMS — FOR SALMON, PEOPLE, AND COMMUNITY

## WHAT IS PSAR?

The Puget Sound Acquisition and Restoration program was created in 2007 to help implement

the most important habitat protection and restoration priorities for Puget Sound. Funding is appropriated by the Legislature and allocated through the Salmon Recovery Funding Board. The Puget Sound Partnership works with local entities to identify and prioritize projects.

## WHY IS PSAR AN EFFECTIVE INVESTMENT?

- PSAR-funded projects restore critical habitat and salmon populations to Puget Sound.

Because the projects are thoroughly reviewed, their benefit to improved salmon habitat in Puget Sound is significant. The projects:

- ✓ Are locally vetted and locally supported
- ✓ Are informed by science and the NOAA-approved Chinook recovery strategy
- ✓ Are endorsed by citizens, cities, counties, tribes, non-profit organizations, and government agencies
- ✓ Generate multiple benefits, such as local jobs and recreational opportunities

To be eligible for funding, proposed projects must first advance through a series of rigorous, science-driven reviews. The reviews occur at the local and regional level and ensure that all PSAR projects align with the **Puget Sound Salmon Recovery Plan**, as well as with the Puget Sound Partnership's ecosystem recovery targets, listed in the **Puget Sound Action Agenda**.

*Staff with the Puget Sound Partnership manage the PSAR grant fund program; PSAR funds are administered through the Washington State Recreation and Conservation Office.
